

I am concerned about recent trend's in large corporate multimedia broadcaster's ability such as Sinclair to use media that could potentially influence the political process.

I would request that the FCC promote rules and equal access to all regardless of access to funding to the very important broadcast media.

I would advocate that the FCC look at the laws and rules in place that may exacerbate the concentration of media control in the hands of "For Profit" Corporations and Government Corporations such as PBS

I would encourage the FCC to explore opening up broadcast television to "Not for Profit" media organization such as the Pacifica Network.

I believe in Free Speech and in equal access to broadcast media by opposing viewpoints that are not dependent upon corporate money.
